Durability & Quality:

FG 400 & FG 500 guide posts are manufactured with post-consumer recycled engineering thermoplastic resins and the highest quality of retro-reflective tapes. **They are built tough to endure multiple high-speed impacts and the rigors of years of installed service.**

Uses & Applications

FG 400 & FG 500 guide posts are the most durable and effective products on the market that both provide bright delineation of roadway edge-lines and medians. Many brands claim to provide durable delineation; the **FG 400 & FG 500** guide posts really deliver.

FG 400 & FG 500 guide posts markers are durable enough for years of use in extreme cold or hot desert sun.

All Flexi-Guide products are approved by the US/DOT FHWA for use on all federal highway projects.

Lengths, Colors and Reflectors

Width: 3.625 inches across Single or double arch design.

Length: Standard Available lengths are: 48, 60, 66, 72 & 78

Colors: Markers are manufactured in two styles (double or single arch) and three standard colors – white, yellow, and gray –additional colors are available for utility applications; such as **APWA Green** or **Pantone 522C**.

Reflective sheeting: Available choices are four grades – **Engineer, High Intensity, Reflexite and Diamond Grades** – each post can be made reflective one or both sides. Informational decals are available by special order.

Optional anchors & Tools

Both posts offer an optional plastic or steel anchor that provides for excellent retention. Both manual and power tools are available for quick and easy install:
