## **FABRICS:** (Note: **only 3rd Party Tested ANSI, NFPA, and ASTM Fabrics**)

**Polyester Summer Mesh & Micro-Mesh:** Soft, Cool, and Comfortable. The approximate 3 OZ Mesh allows maximum comfort. **Also available in Fire Resistant Micro-Mesh (FR)** on select garments.

**Polyester All Season Breathable Knit:** A middle weight 3.65 OZ fabric. Breathable and cool in summer, allows rain and snow to pass through in Winter. **Also available in Fire Resistant (FR)**

**"Blue Jean" Tough Poly-Cotton:** Feels like "Blue Jeans" but tougher. Good in construction where abrasion resistant fabrics are needed. Also in Multi-colors used to color code "First Response Teams."

**"Heavy Weight" Polyester:** All Weather Comfort in a 8 OZ Polyester more than double the standard middle weight fabrics. This Heavy Weight fabric stands up to tougher work environments. This heavier fabric is used for select "Pro's Choice" DOT vests, and "Cruiser" Construction and Survey vests.

**Water Repellent Fabrics:** Nylon Coated Middle Weight Polyesters are used primarily for fall, winter, and spring jackets and coats. **Jackets also available in Fire Resistant (FR).** Heavy Weight Nylon Coated Tear/Abrasion resistant Cordura is used for select Pro's Choice Timber, Survey, Constuction Vests, and select Construction Jackets.

**Specialty FR Fabrics:** NFPA, 70E Arc, and ASTM rated Fire Resistant Fabrics are used in Electrical/Refinery/High Voltage/Metals/-Welding applications including FR Cotton, FR Micro-Mesh, FR Polyester, FR Nomex®, and FR Modified Acrylics. For more on FR fabrics, see the FR Technical Brief on page 51 to 54.

## **REFLECTIVES:** (Note: **only Level 2 Retro-Reflectives for greater Visibility**)

**Silver Fabric Level 2 Reflective:** As a "Reflective Fabric", this reflective is lighter weight, soft, and flexible in movement. **"FR" Silver Reflective meets ASTM & 70E Arc.** Silver reflective for Mesh Products, FR Electrical Products, and Jackets/Coats where weight and flexibility are needed. Silver reflects heat from the hot sun, and will not crack in severe cold, making this the best choice for products used in severe climate such as Summer Mesh T-Shirts/Pull-Overs/Vests, and Winter Jackets/Coats.

**Orange, Yellow, & White Level 2 Vinyl Reflective:** A all weather, all around Level 2 reflective, the 3 vinyl reflective colors in Orange, Yellow, and White offer more flexibility in designs. Sealed vinyl contrasts against fabrics for slightly better all around daylight performance. Orange and Yellow reflectives are also "Combined Performance" per the ANSI Standard, and are used exclusively for Class 3 Single Garment Vest with Sleeve Compliance.

## Sizing:

As much as possible, our sizing to allow customers to select the right size the first time. Chest size and armholes are predictable garment to garment. Length will vary with ANSI Class 1, 2, or 3 background requirements, or if a product was specifically designed to accommodate tool belts. See individual products for descriptions. **If Vests, Shirts, Jackets, or Coats are to be worn over winter layers, measure with these garments on.**

Jackets and Coats use a "Raglan" sleeve design to allow free arm movement in working conditions. Arctic Quilt, Fleece, and Thinsulate(TM) linings are naturally warm so little allowance for layers is needed. Order one size larger for lining. Unlined jackets use the same pattern and will accommodate your normal work clothing layers comfortably. Pants are designed to fit over normal work clothing as well and include elastic and drawstring waist to adjust sizing.

### Sizing Chart: Vests, Shirts, Jackets and Coats

Size	Chest Size (under arms)	Armhole
Small	32-36	30
Medium	38-40	30
Large	42-44	30
X-Large	46-48	32

## SCREEN PRINTING PRICE, POSITION AND COLOR OPTIONS:

Customers may select up to six colors for screening of company logos and/or names. The most common positions are across the back (Size 8 1/2 x 11) and left front chest areas (Size 4 x 4). The pricing matrix applies to these areas. For sleeves and pant legs printing, add an additional 10% for difficulty.

## SCREEN SET-UP:

**Acceptable Art File Formats:** Adobe ACROBAT™ PDFs, Adobe ILLUSTRATOR™, Adobe PHOTOSHOP™ Images (JPEG or TIFF Preferred) Letters and Graphic files must be on a WINDOWS™ operating system.

**CAMERA-READY ART FEE \$22.20 per color** (See Below for definition of Camera Ready Art)

**FIRST TIME: SET UP FEE \$33.30 per color** (creation of screen & initial set-up)

## SCREEN "Camera Ready" ART:

Camera Ready Art is clear, sized to 8 1/2 x 11 back and/or 4 x 4 front with colors separated for immediate screen creation from your image. Images are usually sent via E-Mail

## **ANSI 107/207 Made Easy: Performance Class 1, 2, and 3 Guidelines**

### **ANSI 107 CONSPICUITY Class 1**

Background Material 217 in2 (0.14 m2); Reflective 155 in2 (0.10 m2)  
Permit full and undivided attention to approaching traffic;  
Provide ample separation of the pedestrian worker from vehicle traffic;  
Permit optimum conspicuity in backgrounds that are not complex; and where;  
Vehicle and moving equipment speeds not exceeding 25 mph.

**Examples of workers who could work in this class may include:**

- Workers directing vehicle operators to parking/service locations;
- Workers retrieving shopping carts from parking areas;
- Workers exposed to the hazards of warehouse equipment traffic;
- Roadside "Right of Way" or sidewalk maintenance workers & delivery drivers.

### **ANSI 107/207 CONSPICUITY Class 2**

ANSI 107 Background 775 in2 (0.50 m2); Reflective 201 in2 (0.13 m2)  
ANSI 207 Background 450 in2 (0.30 m2); Reflective 201 in2 (0.13 m2)  
Greater visibility is desired during inclement weather conditions;  
Work Tasks/Emergencies divert attention from approaching traffic;  
Vehicle or moving equipment speeds exceed Class 1 (25 mph); or  
Work activities take place in or near proximity to vehicle traffic.

**Examples of workers who could work in this class may include:**

- Roadway construction workers • Utility workers • Survey Crews
- Railway Worker • Forestry Workers • School Crossing Guards
- Parking or Toll Gate Personnel • Airport Baggage & Ground Crew
- Law Enforcement • Emergency Response Personnel • Accident site investigators

### **ANSI 107 CONSPICUITY Class 2 & 3**

Background Material 1240 in2 (0.80 m2); Reflective 310 in2 (0.20 m2)  
Workers are exposed to high vehicle speeds and/or reduced sight distances;  
Worker and vehicle operator have high task loads, clearly placing the worker in danger; or

Wearer must be conspicuous through the full range of body motions at a minimum of 390 meters (1280 feet) and must be identifiable as a person.

**Examples of workers who could work in this class may include:**

- Roadway construction personnel • Utility workers • Survey crews
- Emergency response personnel • Flagging Crews • DOT Crews

Note: It is the intention of these Performance Class Guidelines and Scenarios to serve as a rudimentary assessment tool only. Certain specific conditions such as atmospheric, sight/stop distances, training, regulations, proximity, must be taken into account in any final hazard/safety assessment. Vehicle speed should not be considered in isolation to these variables. Extreme conditions might exist which require performance levels in excess of Class 3. Photos are used for illustration only, as examples of Class 1, 2, and 3 ANSI High Visibility Garments.
